

Ellesmere House is a 60 bedded nursing home over 4 floors. The ground floor consisting of 10 beds for rehabilitation and a contemplation room has been closed for refurbishment since December 2014. This unit will be transformed into a stunning 20 bedded nursing unit due to open late September 2015.

Over the last 8 months Ellesmere House has consistently been recruiting quality nursing and care staff to irradiate the large percentage of agency staff we were using back in August 2014. Since December 2014 Ellesmere House has reduced the agency staff to Zero apart from a 1-1 carer which has now been replaced with our own permanent staff. We are continuing to recruit to avoid agency usage in the future.

All the staff at Ellesmere House worked extremely hard to deliver a High quality care service that respects all of our resident's dignity when we had a high ratio of agency staff who did not know our residents as well.

All the team at Ellesmere House generally care for all of our residents care and welfare and as their Home Manager I am very proud of what the staff has achieved and continue to deliver on a daily basis.
